Installing an SSL Certificate

Chrome OS

Installing an SSL Certificate (as a Trusted Root Certification Authority)

1) Logon to the device
2) Ensure the device is connected to your wireless network
3) Launch the android built-in Browser (a globe icon) or the Chrome browser and browse to the following URL:

   https://oakfordhelp.co.uk/oakford.crt

4) On the chrome browser go to chrome://settings/certificates
5) Select Authorities
6) Press import
7) Select **Trust this certificate for identifying websites**.
8) Click **OK**.
